

Hosky Inu

Everything terrible
made even worse

www.hoskyinu.io

Welcome

We admired what Hosky was (not) doing for the Cardano ecosystem and felt we could make it even worse.

Welcome to Hosky Inu - the deepfried, dystopian, copy-pasta meme coin we totally don't need but definitely deserve. We promise everything Hosky has to offer but far, far less.

Not interested? Keep reading!

We have nothing to do until real DeFi hits Cardano. Let's embrace this golden window of the Cardano brown coin era.

Let's go.

Important Stuff

Siberian Husky and Shiba Inu mixes actually do exist. And they're super cute!

Let's see (next page).

www.hoskyinu.io

They're labeled as a 'designer breed', which is totally gross, and also something you'll never be able afford with your Hosky Inu.

Pls stop

But you don't care, because you're a degenerate and designer meme coins at zero value are somehow important right now.

Who wants to be new rich when you can be future poor?

Tokenomics:

It's about to get EVEN worse. Keep reading.

While Hosky minted a paltry 1 quadrillion tokens (lame), we've done the noble thing and made the supply of Hosky Inu 1000x larger.

Total Supply:

1,000,000,000,000,000,
000,000

Look at those zeros - bring the screen closer to your face until your eyes get a bit wet.

Emotion or confusion? Exactly.

Distribution

We're giving half of Hosky Inu to Vitalik.

Yeah.

Vitalik.

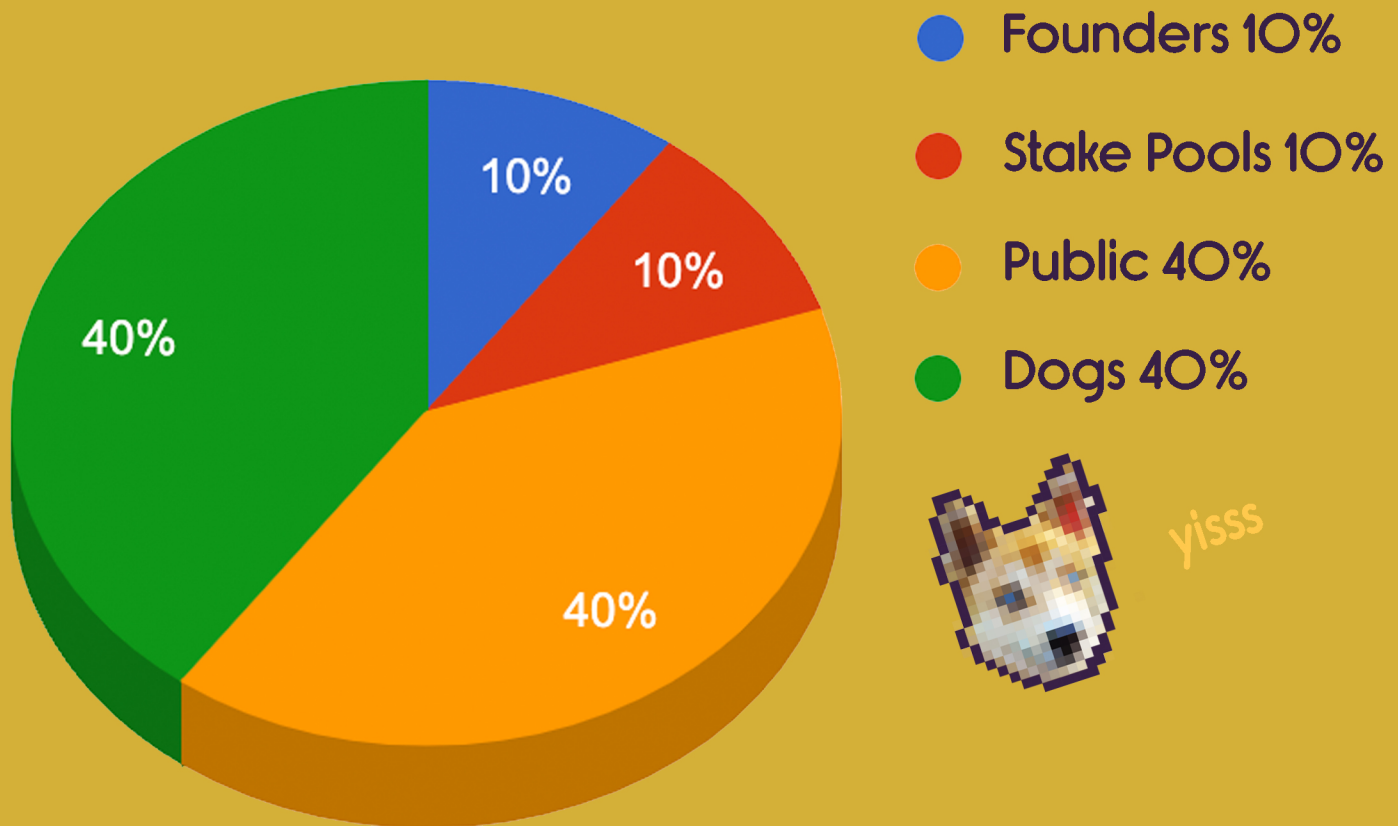

We thought a lot about this – like, 2 minutes at least – and it was the worst idea we could come up with.

Can you imagine Vitalik setting up a Cardano wallet on Yoroi for this?

We can't either. You're welcome.

Circulating Supply

This many: 500,000,000,000,000,000

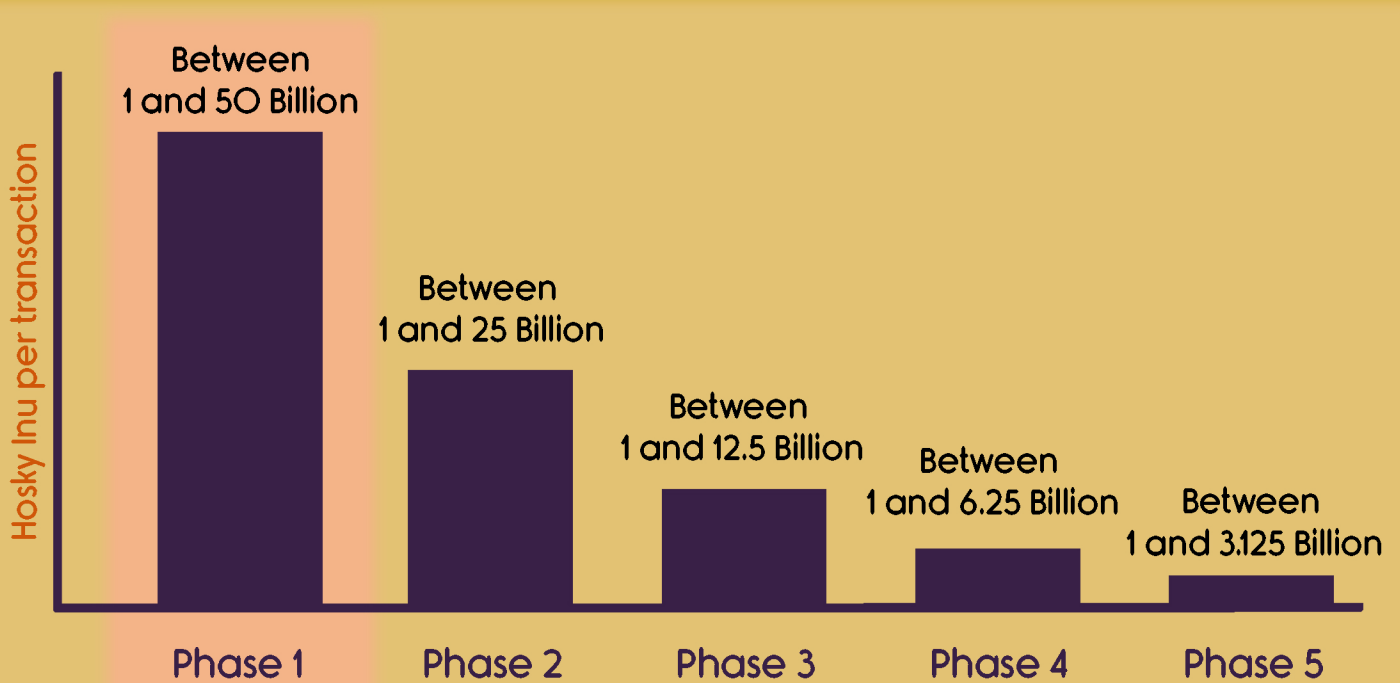

The splits between public and dogs seemed obvious as neither of you will ever be able to redeem this for anything of value.

Maybe we'll donate to a dog charity. Or maybe we'll simply give it all to an actual dog. We haven't decided. Maybe you can help us.

It's FUN

Send 2 ADA, we send at least 1.5 ADA back to you along with some Hosky Inu

Hosky Inu is distributed in 5 phases. Each phase cuts the Hosky Inu reward in half.

We're Here

We are now in Phase 1

Reward: Some random amount between 1 Hosky Inu and 50 billion Hosky Inu.

There is MORE!

Every transaction enters you in a lottery to win additional metals (also worthless!) because why not?

Hosky Inu Silver - 1 in 2 chance of winning

Hosky Inu Gold - 1 in 10 chance of winning

Hosky Inu Platinum - 1 in 100 chance of winning

And just one lucky person will receive ...

The Obvious

By participating, you implicitly understand that these tokens have zero market value but why would that stop you?

We're standing on the shoulders of giants (HOSKY), and have fallen off those shoulders and now pushing through the mud, ceaselessly into the past.
